Solution Overview

The 'Safe Limits Management' module empowers users to update limits across multiple views, ensuring consistent and accurate management of operational parameters. This module enhances the ability to monitor, manage, and enforce safe operational limits, providing a comprehensive solution for maintaining Limits.

Objectives

1. **Enhance Transparency**: Maintain a clear record of changes through an audit trail, ensuring accountability and traceability.
2. **Improve Efficiency**: Enable simultaneous updates of limits across various views to streamline the management process.
3. **Enable Real-Time Monitoring**: Allow users to check the status of parameters instantly, allowing them to quickly respond.

Benefits

1. **Operational Efficiency**: Streamline the process of updating and managing limits, saving time and resources.
2. **Real-Time Insights**: Immediate access to current parameter status.
3. **Accountability and Traceability**: Detailed audit trails provide a clear record of all changes, ensuring accountability and ease of auditing.

Features

1. **Limits Management**: Update and manage safe limits across various views simultaneously.
